

Senery Toulouse v 1.5

For X-Plane 8.50 Overlay (DSF version) and more

1. Legal notice:

This scenery is a freeware, it is entirely free of charge and may not be used for commercial purpose. You must redistribute the scenery with all it's files.

You load this scenery at your own risk, without any warranty, the authors can not be considered responsible for any troubles or damages resulting from it's use.

2. Install and Update :

For an update, it is recommended to delete any previous directory of Toulouse.

Unzip and move the directory "Toulouse" in "Custom Scenery" of X-plane and uncheck "Allow slopped runways" in Rendering options

Then, you can launch X-Plane and put your aircraft at Toulouse-Blagnac(LFBO), or Lasbordes(LFCL) or Muret L'HERM(LFBR) and you can enjoy...

3. How to use Marginal's Autogates:

Blagnac's Gate (LFBO) are animated by Marginal's plugin and you can download it at: <http://marginal.org.uk/x-planescenery/AutoGate.zip>

Read the ReadMe.txt in the package to know how to install it.

4. Credits :

- *Autors:*

- Pascal Fouilland alias "bibounde5"
- Fabrice BELON alias "fafa31"

Thanks to "Moustache" and "Patrick Castay" and "Vincent Meens" from FS wich give us the right to import their FS2004 scenery into x-plane. You can find them at: <http://perso.wanadoo.fr/moustache/>

- *Statics Objects:*

- Pack French from Skytrek (xp-fc.org)
- Trees from Al-Youx (xp-fc.org)
- A380 without livery from EDDH scenery of Kevtherev
- Beluga from BelugaProject (x-plane.org)
- AS352_PUMA from Planebuilder
- Statics Aircraft from Beber (Airport Collection and Airfield_collection))

a big thanks to them ;).
